A GALLING SUBJUGATION.

"WE ARE TOO WILLING TO GIVE UP OUR WEAPONS TO THE ENEMY."

Dr. Talmage Says Infidelity is Making a Mighty Attempt to Get Our Weapons in Its Hand and Then to

ernacle this morning the Rev. T. De Witt Talmage, D. D., after expounding passages of Scripture, gave out the hymn beginning: How firm a foundation, ye saints of the Lord. Hath He laid for your faith in His excellent Word!

The text of the sermon was Samuel I: xiii, 10-21: "Now there was no smith found throughout all the land of Israel; for the Philistines said, Lest the Hebrews make them swords or spears. But all the Israelites went down to the Philistines to sharpen, every man his share, and his coulter, and his ax, and his mattock. Yet they had a file for the mattock, and for the coulters, and for the forks, and for the axes, and to sharpen the goads." Dr.

the axes, and to sharpen the goads." Dr. Talmage spoke as follows:

What a galling subjugation for the Israelites! The Philistines had carried off all the black-smiths, and torn down all the blacksmiths' take in the land of Israel. The Philistines would not even allow these parties to work their valuable mines of brass and fron, nor might they make any swords or spears. There were only two swords left in all the land. Yea, these Philistines went on until they had taken all the grindstones from the land of Israel, so that if an Israelitish farmer wanted to sharpen his plow or his sr, he had to go over to the garrison of the Philistines to get it done. There was only one sharpening instrument left in the land, and that was a file. The farmers and the mechanics, having nothing to whot up the coulter, and the goad, and the picksax, save a simple file, industry was hindered, and work practically disgraced. The great idea of these Philistines was to keep the Israelites disarmed. They might get fron out of the hills to make swords of, but they would not have any blacksmiths to weld this iron. If they got the iron welded they would have no grindstones on which to bring the instruments of agriculture or the military weapon up to an edge. Oh, you poon to keep their heel on the neck of God's children. Jonathan, on his hands and knees, climbs up a great rock, beyond which were the Philistines, and his srmor-beaver, on his hands up the same rock, and those two men, with their two swords, how to pleeces the Philistines, the Lord throwing a great tork, beyond which were the Philistines, and his srmor-beaver, on his hands up the same rock, and those two men, with their two swords, how to pleeces the Philistines, the Lord throwing a great tork, beyond which were the Philistines, and his srmor-beaver, on his hands and knees, climbs up the same rock, and those two men, with their two swords, how to pleece the Philistines, the Lord throwing a great tork, beyond which were the Philistines, and his sermor-beaver, on his hands and kn Talmage spoke as follows: obtained a supply of swords and weapons, as for instance, when they took the spoils of the Ammonites, but these israelites seemed content to have no swords, no spears, no blacksmiths, no grindstones, no active iron mines antilit was too late for them to make any resistance. I see the farmers tagging along with their pickaxes and plow, and I say; "Where are you going with those things". They say: "Oh, we are going over to the garrison of the Fhilistines to get these things sharpened." I say: "You toolish men, why don't you sharpen them at home?" "Oh," they say, "the black-saniths' shops are all torn down, and we have nothing left us but a file."

So it is in the church of Jesus Christ to-day, We are too willing to give up our weapons to the ensure. The things that it has too-bled up the schools, and the colleges, and the arts, and the sciences, and the literature, and the printing press. Infidelity is making a mighty attempt to get all our weapons in its hand and then to keep them. You know it is making this boast all the time: and after a wille, when the great hattle between sin and rightcoulaness has opened, if we do not look out we will be as badly off as these leraelites without any sharpening instruments. I call upon the superintendents of light with and without any sharpening instruments. I call upon the superintendents of light with and without any sharpening instruments. I call upon the superintendents of light with and will be electric batteries, and the microscopes to children of tood not Phistines. The Carlylean, Emersonian, and Tynaillean thinkers of this city are trying to get intellectual weapons of this country in their own grang might be beat the besteric healteries, and the microscopes, and lecturing Christians to capture the philosophy, and lecturing Christians to capture the philosophy, and philosophic Christians to capture the schoolartic Christians to capture the beholartic Christians to capture the beholartic Christians to capture the beholartic Christians to capture the schoolartic Christi

against Schenkel, and Strauss, and Renan, a Theodore Christlieb, of Bonn; and against the infidel scientists of the day a God-worshiping Silliman, and Hitchcock, and Agassiz. We want to capture all the philosophical apparatus, and awing around the telescopes on the swivel, until through them we can see the morning star of the Redesimer, and with mineralogical hammer discover the Rock of Ages, and amid the Kora of all resulms du the Roca of Sharon sad the Lily of the Valley.

We want a clergy learned enough to discourse of the human eye, showing it to be a microscope and telescope in one instrument, with eight wonderful contrivances, and ilds clowing 30,000 or 40,000 times a day; all its muscless, and nerve, and bones showing the infinite skill of an infinite God, and then winding up with the peroration: "He that formed the eye, shall file tot see?" And then we want to discourse

20.000 or 40.000 times a day; sil its muscles, and nerve, and bones showing the infinite skill of an infinite God, and then winding up with the peroration; "He that formed the eye, shall fie not see?" And then we want to discourse about the human ear, its wonderful integuments, membranes, and vibration, and its chain of small bones, and its auditory nerve, closing with the question; "He that planted the ear, shall lie not hear?" And we want some one able to expound the first chapter of Genesis, bring to it the geology and the astronomy of the world, until, as Job suggested; "The stones of the field shall be in lengue" with the truth, and the stars in their course shall fight against Sisera. O. Church of God, go out and recapture these weapons!

Let men of God go out and take possession of the platform. Let any pristing presses that have been captured by the entemy be recaptured for God: and the reporters, and the type-setters, and the editors, and the publishers swear allegiance to the Lord God of truth. Ah, my triend, that day must come, and if the great body of Christian men have not the faith, or the courage, or the consecration to do it, then letsome Jonathan, on his busy hands and en his praying kness, climb up on the rock of hindrance, and in the name of the Lord God of Jarsal slash to pleces those literary Philistines. If these men will not be converted to God then they must be overthrown.

I. Again, I learn from this subject what a large amount of the church's resources is actually hidden, and buried, and undeveloped. The Bible intimates that that was a very rich land, this land of israel. It says: "The shores are tron, and out of the hills thou shalled brans," and yet hundreds and thousands of dollars' worth of this metal was kept under the hills. Well, that is the difficulty with the church of God at this day. Its talent is not developed. If one-half of its energy out he believed to God. There is enough undeveloped energy in this one church to bring all the United States to Christ—enough undeveloped c

whole line!"

We want all the laymen enlisted. Ministers are numerically too small. They do the best they can. They are the most overworked class on earth. Many of them die of dyspeptal because they cannot get the right kind of food to eat, or, getting the right kind, are so worried that they take it down in chunis. They die from consumption coming from early and late exposure. If a novelist or a historian publishes one book a year he is considered industrious. But every pastor must originate enough thought for three or four volumes a year. Ministers receive enough calls in a year from mea who have maps, and medicines, and lightning rods, and pictures to sell to exhaust heir vitality. They are bored with agents of all sorts. They are all in draughts at funerals, and possoned by the unvanithed recome of invalids, and waited upon by committees who want addresses made, until life becomes a borden to bear. It is not hard study that makes musters look pale. It is the infinity of interruptions and botherations to which they are subjected. If I die before my time, it will be at the hand of committees that want an addresser a electure. A man called on me to give him a lecture by which he might pay the expenses of his wedding trip. If there were fifty hours in each day of the year, and I worked forty of them, I could not do the work of this non parely, and the product of the pay the men got to run there will be as unued blood on your skirts as on mine. Let us quit We want all the laymen enlisted. Ministers

No. 1013 F street N. W.

this grand farce of trying to save the world by a few ciergymen, and let all hands lay hold of the work. Give us in all of our churches two or three aroused and qualified men and women to help. In most churches to-day five or ten men are compelled to do all the work. A vast majority of churches are at their with end how to carry on a prayer meeting if the minister is not there, when there ought to be enough pent up energy and religious force to make a meeting go on with such power that the minister would never be missed. The Church stands working the pumps of a few ministerial cisterns until the buckets are dry and choked, while there are thousands of fountains from which might be dipped up the waters of eternal life! Before you and I have the sod pressing our eyetids we will, under took, decide whether our children shall grow up andids the accursed surnidst the accursed surroundings of vice and shame, or come to an inheritance of rightcousness. Long, loud, bit-ter will be the curse that scarches our grave if, holding within the church to-day enough ing but Christ and a desire to bring all the world to Him, we might move upon the enemy's works. For a little while neaven would not have trumpets enough to celebrate the victors.

III. Again: I learn from this subject that we sometimes do well to take advantage of the world's sharpening instruments. Those Israelites were reduced to a flie, and so they went over to the garrison of the Philistines to get their axes, and their goads, and their plows sharpened. The Bible disinctly states it—the text which I read at the beginning of the service—that they had no other Insuruments now with which to do this work, and the Israelites did right when they went over to the Philistines to use their grindstones. My friends, is it not right for us to employ the world's grindstones? If there be art, if there be the slide, let us go over and employ it for Christ's sake. The fact is, we fight with too dull weapons, and we work with too dull impements. We hack and mani when we ought to make a keen stroke. Let us go over among sharp business men, and among sharp interary men, and find out what their tact is, and then transfer it to the cause of Christ. If they have science and ast it will do us good to rub against it.

IV. Again: my subject teaches us on what a small allowance Philistine intiquity puts a man. Yes; these Philistines shut sp the mines, and then they took the spears and the swords; then they took the spears and the swords; then they took the spears and the swords; then they took the spears and keeps on until the whole nature is gone. Was the day works: it grabs everything. It begins with robbery, and ends with robbery, and ends with robbery, and ends with robbery, it despois the shortly one the shortly one was he fise in personal appearance. It mars his visage. Was he affinent, it sends the shortly to be the shortly to one was the usan eloquent before, it generally thickens his tongue. Was he fise in personal appearance. In mars his visage. Was he affinent, it sends the shortly to be a groan. The fliagree is made tur

The Scripture was his jest-book, whence he drew

Bonnetz to gall the Christian and the Jew.

An infidet when well, but when sick?

Ob, then a text would touch him to the quick! Seized with hemorrhage of the tungs in Paris, where he had gone to be crowned as the idol of all France, he sends a messenger to get a priest that he may be reconciled to the church before he dies. A great terror falls upon him He makes the place all round about him so dismal that the nurse declared that she would not for all the wealth of Europe see another infidel die. Philistine Imjurity had promised him all the world's gariands, but in the last hour of his life, when he needed a sols-riar, sent tearing across his conscience and his morves a file, a file. So it was with Lord lyron, his uncleanness in England only surpassed by his uncleanness in England only surpassed by his uncleanness in England only surpassed by his nurse Fletcher, fretting at his sourse Fletcher, fretting at his solre fretting at the world fretting at his solre fretting at Seized with hemorrhage of the lungs in

Woodward & Lothrop

No. 1013 F street N. W.

at his heart something like a canker. Sin, like a monster wild beast of the torest, sometimes licks all over its victim in order that the victim may be more easily swallowed; but generally sin rasps, and galls, and tears, and uphraids, and files. Is it not so, Rerod? Is it not so. Hiddebrand? Is it not so, Robespierre? Aye; aye! It is so, it is so, "The way of the wicked He turneth upside down." History tells us that when Rome was founded, on that day there were twelve vultures lying through the air; but when a transgressor dies the sky is black with whole flocks of them. Vultures vultures! vultures! When i see sin robbing so many of my hearers, and I see them going down day by day and week by week, I must give a plain warning. I dare not keep it back incheape Rock, thinking

wicked thou shalt surely die, sn't thou rivest him not warning, that same man shall die his in logity, but his blood will I require at thy hands."

V. I learn from this subject what a sad thing it is when the church of God lose its nausal! These Philistines saw that if they could only get all the metallic weapons out of the hands of the Israelites, all would be well, and therefore they took the swords and the spears. They did not want them to have a single metallic weapon. When the metal of the Israelites was gone, their strength was gone. This is the trouble with the church of God to-day it is surrendering its courage. It has not git enough metal, How seldom it is that you see a man taking his position in pew or in pripid or in a religious society, and holding that position against all oppression, and all trail and all persecution, and all criticism.

The Church of God to-day wants more backbone, more defisnce, more consecrated bravery, more metal. How often you see a man start out in some good enterprise, and at the first blast of opposition he has collapsed and at his courage gone, forgotting the fact that it a man be right all the opposition of the earth pounding away at him cannot do him any permanent damage. It is only when a man is wrong that he can be damaged. Why, God is going to windicate His truth, and he is going to stand by you, my friends, in every offert you make for Christ's cause and the salvation of mon.

Go forth in the service of Christ and do your whole duty. You have one sphere. The another sphere. "The Lord of Hosts twith us and the God of Jacob is our refuge. Selah. We want more of the determination of Jonathen I do not you have one sphere that he had not be remained to the general who went into the war, and as he entered his first battle his kness and as an an of very ordinary intellectual attalments on his kness can storm anything tor God and the truth. We want something of the do-termination of the general who went into the var, and ashe entered his first battle his kness knocked toge

have been benefited three months ago never ogain coming under our Christian influence. Ch. is it not high time that we awake out of sleep? Church of God, lift up your head at the coming relicory? The Philiatines will go down and the Israelites will go up. We are on the winning side. I trink just now the king's horses are being hooked up to the chariot, and when Ha does rile down the sky there will be such a horana among His fleads and such a walling among his enemies as will make the carch tremble and the heavents ago. I see now the plumes of the Lord's cavalrymea tossing in the sit. The archangel before the throne has already burnished his triumpet, and then he will but its golden line to his own, and he will blow the long, loud blast that will make all the nations free. Clap your hands, all ye people? Hark! I hear the falling thrones and the dashing down of demolished infquities. "Halleliush, the Lord God omanipotent reigneth! Halleliush, the kingdoms of this world are become the kingdoms of our Lord Jesus Christ."

An eminent physician says: "The great rem-edy known as Celery, Beef, and Iron is a rentle stimulant as well as nutrilive, and all who have used it pronounce it to have been taken with excellent results, especially when taken or brain trouble, nervous prostration, or dis-orders of the stomach. Celery, as a cure for nervous affections, is invaluable. Beef is the most nutritions and invigorating of all meats, and as a tonic for the bleed and food for the brain there is nothing botter than pyrophos-brain there is nothing botter than pyrophos-

An Interesting Day in the Stock

transactions of less than 3,000 shares; it later with a large business recovered to 50%, decided to 54%, and closed at 53%. The general impression that "nothing done" at yesterday's meeting meant an abandonment of the consolidating scheme was ensouraged by the spokesmen of the Manhattan interest, who so dithe stock at the lowest prices of the day. The general market, however, was little affected by the break in New York and New England or by the unsettled condition of the Reading speculation, which closed that stock I per cent, lower than last evening. Privarishness and frequent fluctuations there were, but the final changes generally are small, as the gains and losses are about evenly divided. The trunk line shares ruled firm; the granders were better rather than worse. Pacific Mail moved toward its "permanent valuation of 50," by the way of a decline of 2 per cent, to 54% and closed with a final gain of 24 per cent, at 77%.

Government bonds were dull and easy; the bids for 4's were off \(\frac{1}{2} \) per cent. State bonds dull. Railway bonds ruled firm, but the business done was small. The money market ruled easier a 6 a 7 per cent. In the early hours and later at 5 a 6 per cent, and closed with offerings at 5 per cent. In London British consols were steady at 100 15-16 and 101 1-16 respectively for money and account. American railways ruled dul and generally closed dull and lower than last ovening.
